## Introduction

Foreword – Special Issue – "Eighth multidisciplinary conference on sinkholes and the engineering and environmental impacts of karst": LaMoreaux PE, Zhou W 445
Introduction to the Special Issue: "Subsurface flow and transport: from theoretical studies to actions at field sites": Tsang C-F, Shestakov VM 125

## Editorial

Introduction to special issue of *Environmental Geology* journal on geoindicators: Berger AR, Satkunas J 709

## Original articles

$^{18}O_{SO_4}$ and $^{18}O_{H_2O}$ as prospective indicators of elevated arsenic in the Goose River ground-watershed, Maine: Sidle WC 350
A case study on changes in quality of groundwater with seasonal fluctuations of Pageru river basin, Cuddapah District, Andhra Pradesh, India: Sreedevi PD 414
A comparative study on nitrogen-concentration dynamics in surface water in a heterogeneous landscape: Chen L, Fu B, Zhang S, Qiu J, Guo X, Yang F 424
A comparison of the sludge conditioning capabilities of *Canavalia ensiformis* and *Brachystegen eurycoma*: Eze RAM 88
A developed technique for calculating the mass transfer between contaminated groundwater and porous media: Zheng X, Balke K-D, Armannsson H, Qui H, She Z 982
A powder diffraction quantification method (ALJOR) for atmospheric particulate matter: Jordán MM, Alvarez C, Sanfeliu T 810
A study of caprock hydromechanical changes associated with $CO_2$-injection into a brine formation: Rutqvist J, Tsang C-F 296
Adsorption of dimethoate and 2,4-D on Jordan Valley soils and their environmental impacts: Al Kuisi M 666
Adsorption of phosphate on tidal flat surface sediments from the Yangtze Estuary: Liu M, Hou L, Xu S, Ou D, Yang Y, Zhang B, Liu Q 657
Afforestation by slope terracing accelerates erosion. A case study in the Barranco de Barcedana (Conca de Tremp, NE Spain): Linares R, Rosell J, Pallí L, Roqué C 11
Analysis of effective diffusion and transport of inorganic solute through a landfill liner system: Jang Y-S, Hong G-T 929
Analysis of geological Sr isotope markers in fish otoliths with subannual resolution using laser ablation-multicollector-ICP-mass spectrometry: Outridge PM, Chenery SR, Babaluk JA, Reist JD 891
Annual emissions of mercury to the atmosphere from natural sources in Nevada and California: Coolbaugh MF, Gustin MS, Rytuba JJ 338
Application of a two-dimensional electrical tomography technique for investigating landslides along the Amman–Dead Sea highway, Jordan: Batayneh AT, Al-Diabat AA 399
Arsenic in groundwater affected by phosphate fertilizers at São Paulo, Brazil: Campos V 83
Assessing groundwater recharge with two unsaturated zone modeling technologies: Gogolev MI 248
Assessment of hydrological parameters in heterogeneous fractured rock: Drozhko EG, Ivanov IA, Samsonova LM, Glagolev AV, Glinsky ML, Ter-Saakian NF, Skokov AV, Looney B, Nichols R, Hutter A, Wollenberg H 178
Back-analysis of a seismically induced highway embankment failure during the 1999 Düzce earthquake: Aydan Ö, Ulusay R 621
Calculating capillary pressures in frozen and ice-free soils below the melting temperature: Grant SA, Sletten RS 130
Changes in groundwater quality in a conduit-flow-dominated karst aquifer, following BMP implementation: Currens JC 525
Characterisation of fluorescence background in dye tracing: Smart CC, Karunaratne KC 492
Characterization of heavy metal contaminated soils in Northern Cyprus: Yukselen MA 597
Characterizing water-level changes due to fracturing generated by the strike-slip fault of the 12 November 1999, Düzce, Turkey, earthquake using the VLF method: Özürlan G, Karaman A 61
Climatic water balance and droughts of Pageru River Basin, Cuddapah District, Andhra Pradesh: Sreedevi PD 681
Coastal geoindicators of environmental change in the humid tropics: Morton RA 711
Comparative major ion geochemistry of Piedmont streams in the Atlanta, Georgia region: possible effects of urbanization: Rose S 102
Concentrations of elements and metals in sediments of the southeastern Gulf of Mexico: Vazquez FG, Sharma VK, Perez-Cruz L 41
Detection of fluorescent compounds in the environment using granular activated charcoal detectors: Smart C, Simpson B 538
Development of a coupled surface-groundwater-pipe network model for the sustainable management of karstic groundwater: Adams R, Parkin G 513
Development of relationship between specific storage and depth of sandy and clay formations: Shestakov VM 127
Effect of groundwater table fluctuations on LNAPL thickness in monitoring wells: Aral MM, Liao B 151
Effective electrode array in mapping karst hazards in electrical resistivity tomography: Zhou W, Beck BF, Adams AL 922
Efficient hydrologic tracer-test design for tracer-mass estimation and sample-collection frequency, 1. Method development: Field MS 827
Efficient hydrologic tracer-test design for tracer-mass estimation and sample-collection frequency, 2. Experimental results: Field MS 839
Engineering geological characterisation of the rock masses at Tannur Dam site, South Jordan: El-Naqa A, Al Kuisi M 817
Environmental impacts of El Arish power plant on the Mediterranean coast of Sinai, Egypt: Frihy OE, Badr AA, Selim MA, El Sayed WR 604
Evaluation of air injection and extraction tests in a landfill site in Korea: implications for landfill management: Lee JY, Lee CH, Lee KK 945
Evaluation of the risk of the formation of karst-related surface instability features in dolomite strata occurring in the Lebowakgomo area, Republic of South Africa: Calitz F 499
Factorial and indicator kriging methods using a geographic information system to delineate spatial variation and pollution sources of soil heavy metals: Lin Y-P, Chang T-K, Shih C-W, Tseng C-H 900
Flow and transport modeling of liquid radioactive waste injection using data from the Siberian Chemical Plant Injection Site: Shestakov VM, Kuvaev AA, Lekhov AV, Pozdniakov SP, Rybalchenko AI, Zubkov AV, Davis PA, Kalinina EA 214
Geochemical characterization and pollution phenomena of aquifer waters in northern Israel: Kafri U, Lang B, Halicz L, Yoffe O 370

Geochemical methods for distinguishing surface water from groundwater in the Knox Aquifer System: Redwine JC, Howell JR 485
Geohazard assessment of sand dunes between Jeddah and Al-Lith, western Saudi Arabia: Al-Harthi AA 360
Geoindicators for river and river-valley monitoring in the humid tropics: Osterkamp WR 725
Geoindicators for tropical urbanization: Gupta A 736
Geological and geotechnical context of cover collapse and subsidence in mid-continent US clay-mantled karst: Cooley T 469
Geomorphological, geochemical and geo-environmental aspects of karstification in the urban areas of Kerman city, southeastern, Iran: Atapour H, Aftabi A 783
Geoscience and sustainable catchment and resource management: the Ben Chifley Catchment case study: Al Bakri D 588
Groundwater abstraction and contamination in Lithuania as geoindicators of environmental change: Klimas A, Gregorauskas M 767
Groundwater and surface water contamination in the area of the Hitura nickel mine, Western Finland: Heikkinen PM, Korkka-Niemi K, Lahti M, Salonen V-P 313
Groundwater resources of river Kan Gimi Basin, north-central, Nigeria: Alagbe SA 404
Gypsum karst, Sivas, Turkey: Günay G 387
Halite karst geohazards (natural and man-made) in the United Kingdom: Cooper AH 505
Heavy-metal contaminants in Tamaki Estuary: impact of city development and growth, Auckland, New Zealand: Abrahim G, Parker R 883
Heavy metal concentrations in marine sediments impacted by a mine-tailings spill, Marinduque Island, Philippines: David CP 955
Heavy metal concentrations in surficial sediments from accreting and eroding areas along the coast of Guyana: Lakhan VC, Cabana K, LaValle PD 73
Heavy metal trends in the Calabar River, Nigeria: Akpan ER, Ekpe UJ, Ibok UJ 47
Hydro-mechanical evaluation of soil stabilized with cement-kiln dust in arid lands: Mohamed AMO 910
Indoor radon concentrations in relation to geology in Slovenia: Popit A, Vaupotič J 330
Influence of physical characteristics of weak rock mass on height of caved zone over abandoned subsurface coal mines: Palchik V 92
Integrated high-resolution geophysical investigations as potential tools for water resource investigations in karst terrain: McGrath RJ, Styles P, Thomas E, Neale S 552
Intrinsic biodegradation of toluene coupled to the microbial reduction of ferric iron: laboratory column experiments: Zheng Z, Aagaard P, Breedveld GD 649
Investigation of pyrite-weathering processes in the vadose zone using optical oxygen sensors: Hecht H, Kölling M 800
Karst geoindicators of environmental change: The case of Lithuania: Taminskas J, Marcinkevicius V 757
Karst unit mapping using geographic information system technology, Mower County, Minnesota, USA: Green JA, Marken WJ, Alexander Jr. EC, Alexander SC 457
KARSTIC: a sensitivity method for carbonate aquifers in karst terrain: Davis AD, Long AJ, Wireman M 65
Karstification below dam sites: a model of increasing leakage from reservoirs: Dreybrodt W, Romanov D, Gabrovsek F 518
Leaching of coal-mine tips (Nord-Pas-de-Calais coal basin, France) and sulphate transfer to the chalk aquifer: example of acid mine drainage in a buffered environment: Denimal S, Tribovillard N, Barbecot F, Dever L 966
Legal impediments to utilizing groundwater as a municipal water supply source in karst terrain in the United States: Richardson Jr. JJ 532
Mapping of heavy metal loadings in soils by means of magnetic susceptibility measurements: Hanesch M, Scholger R 857
Mineralogical characterization of microbial ferrihydrite and schwertmannite, and non-biogenic Al-sulfate precipitates from acid mine drainage in the Donghae mine area, Korea: Kim JJ, Kim SJ, Tazaki K 19
Mineralogy of fine-grained sediment by energy-dispersive spectrometry (EDS) image analysis - a methodology: Knight RD, Klassen RA, Hunt P 32
Model intercomparison study to investigate a dense contaminant plume in a complex hydrogeologic system: Williams MD, Cole CR, Foley MG, Zinina GA, Zinin AI, Vasil'kova NA, Samsonova LM 199
Modeling groundwater-surface water interactions including effects of morphogenetic depressions in the Chernobyl exclusion zone: Bixio AC, Gambolati G, Paniconi C, Putti M, Shestopalov VM, Bublias VN, Bohuslavsky AS, Kasteltseva NB, Rudenko YF 162
Modelling of mine flooding and consequences in the mine hydrogeological environment: flooding of the Koenigstein mine, Germany: Jakubick AT, Jenk U, Kahnt R 222
Multi-element removal from road-deposited sediments using weak hydrochloric acid: Sutherland RA 937
Multiphase flow dynamics during $CO_2$ disposal into saline aquifers: Pruess K, García J 282
Multivariate geostatistical methods to identify and map spatial variations of soil heavy metals: Lin Y-P 1
Natural hexavalent chromium in groundwaters interacting with ophiolitic rocks: Fantoni D, Brozzo G, Canepa M, Cipolli F, Marini L, Ottonello G, Zuccolini MV 871
New advances in karst collapse research in China: Lei M, Jiang X, Yu L 462
New evidence for the combined influence of vapor condensation and thermal convection on groundwater monitoring wells: Solodov IN, Malkovsky VI, Pek AA, Benson SM 145
On the evaluation of groundwater contamination from underground nuclear tests: Tompson AFB, Bruton CJ, Pawloski GA, Smith DK, Bourcier WL, Shumaker DE, Kersting AB, Carle SF, Maxwell RM 235
Performance evaluation of landfills with the HELP (hydrologic evaluation of landfill performance) model: Izmit case study: Yalçin F, Demirer GN 793
Poroelastic analysis of cover-collapse sinkhole formation by piezometric surface drawdown: Tharp TM 447
Principles of regional assessment and mapping of natural groundwater resources: Zektser IS 270
Quantification of weathering depths in slightly weathered tuffs: Topal T 632
Rapid changes on the coast of Lake Peipsi and their environmental consequences: Tavast E, Raukas A 750
Reduction of hexavalent chromium by pyrite-rich andesite in different anionic solutions: Kim J-G, Jung P-K, Moon H-S, Chon C-M 642
Relationship between radon concentrations in indoor air and in soil gas: Vaupotič J, Andjelov M, Kobal I 583
Scientific considerations related to regulation development for $CO_2$ sequestration in brine formations: Tsang C-F, Benson SM, Kobelski B, Smith RE 275

Spatial and temporal variation of heavy metals in a tropical estuary: Bahena-Manjarrez JL, Rosales-Hoz L, Carranza-Edwards A 575
Structural, geomorphological and geomechanical aspects of the Koyulhisar landslides in the North Anatolian Fault Zone (Sivas, Turkey): Sendir H, Imaz I 52
Study of groundwater contamination by radioactive brine: the Lake Karachai case: Rumynin VG, Sindalovskiy LN, Konosavsky PK, Boronina AV, Gallo C, Zaadnoordijk WJ 187
Subsidence rates and urban damages in alluvial dolines of the Central Ebro basin (NE Spain): Soriano MA, Simón JL 476
System analysis to estimate subsurface flow: from global level to the State of Minnesota: Shmagin BA, Kanivetsky R 259
Test methods for characterizing contaminant transport in a glaciated carbonate aquifer: Worthington SRH 546
The chemistry of groundwater: A geoindicator of environmental change across the Polish-Lithuanian border: Giedraitiene J, Satkunas J, Graniczny M, Doktor S 743
The effect of carbon steel-wool in removal of arsenic from drinking water: Campos V 81
The relationship between slope gradient and lateritic cobble orientation with respect to shape, northwestern Taiwan: Chen H, Tsai BR 565
Trace-metal pollution of soils in northern England: Rawlins BG, Lister TR, Mackenzie AC 612
Tracer mixing at fracture intersections: Li G 137
Use of chemical tracing to study acquisition modalities of the mineralization and behaviour of unconfined groundwaters under a semi-arid climate: the case of the Souss plain (Morocco): Hsissou Y, Bouchaou L, Mudry J, Mania J, Chauve P 672
Water contamination downstream from a copper mine in the Apuseni Mountains, Romania: Milu V, Leroy JL, Peiffert C 773
Water quality assessment and the investigation of the relationship between the River Delice and the aquifer systems in the vicinity of Yerköy (Yozgat, Turkey): Çelik M 690

## Rebuttal

Reply to comments of T. Yalcin and F. Suner (Environmental Geology 39(5): 433–436) – "More on the Jelenia Góra-Cieplice thermal waters": Dowgiałło J 114
Response to B. Morse (2001) on "The role of arsenic-bearing rocks in groundwater pollution at Zimapan Valley, Mexico" by Armienta and others, Environmental Geology 40(4/5): Armienta MA, Ongley LK, Rodríguez R, Villaseñor G, Mango H 433

## Comment

Summary comments on research collaboration between Russian and Western geoscientists: Osipov VI, Pozdniakov SP 306

## Erratum

Mineralogical-chemical composition and environmental risk potential of pond sediments at the geothermal field of Los Azufres, Mexico: Birkle P, Merkel B 116
